DENIS presentation

Established in 1855 in BROU at 1.30 hours from Paris the family DENIS designs, manufactures and markets mechanical handling and cleaning equipment for cereals, grains, pellets, powders and various bulk products.

Thank to our years of experience, we have acquired a knowledge that allows us to develop a wide range of equipment such as (screw conveyors, trough augers, chain conveyors, belt conveyors, belt & bucket elevators, rotary sweep extractors, sweep augers, flat screen or rotary drum cleaners, etc...).

Our engineering design office's expertise is based on all our skills and know-how to meet our clients' needs. We are able to carry out a complete design of a project; as creation, extension, rehabilitation. The mastery of our various processes and continuous investments in industrial tools allowed us to develop the skills and production capacity of our 24 000 sq. meters factory.

The 200 men and women who contribute daily to the company's expansion are proud to be part of it. The national and international presence of our partners (dealers and installers) allows us to provide personalised support in customers projects realisations. The erection and maintenance of the equipment are carried out by our network of installers.

Today, we are recognised for our expertise, our equipment quality and its knowledge.

Our Key figures

8 hectares
Industrial complex

a **24,000 m²**
factory

200
employees

€ 25,000,000
turnover

5,000
devices manufactured per year

40,000
accessories

220,000
spare parts in stock

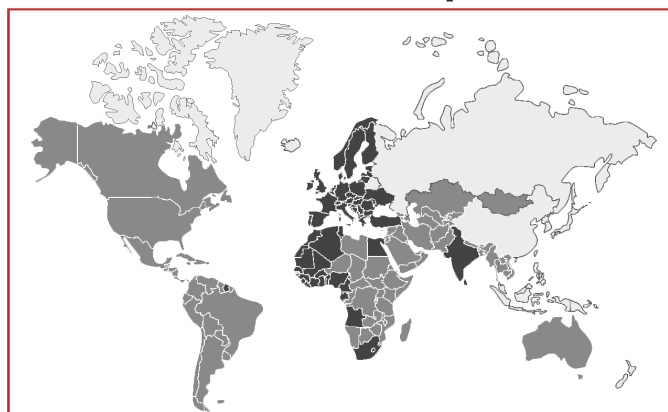

100%
made in France

100 installers

40
countries

An **INTERNATIONAL**
presence

30%
export
turnover
